Profile Summary

I am a computer scientist working at the intersection of distributed systems, collective artificial intelligence, and human-machine systems, with extensive experience in academic leadership and interdisciplinary program development. My research examines how large-scale intelligent systems coordinate, adapt, and remain interpretable when operating in real-world environments involving both machines and human decision-makers. This work connects theoretical models of distributed coordination with applied system design in domains such as infrastructure, networks, and socio-technical platforms.

Alongside my research, I have led the creation and development of academic programs and research initiatives across Europe and China. I have served in senior leadership roles including Associate Dean and Interim Dean, with responsibility for curriculum architecture, faculty development, and the integration of engineering research with design-driven, application-oriented education. Building on this experience, my interests increasingly center on applied graduate education and research structures that bridge intelligent systems, design practice, and industry-oriented innovation in urban settings.

Academic appointments

- **Maître de Conférences (*tenured*)**, Sorbonne Université, France – 2004 - present
- **Professor of Practice in Computer Science**, NYU Shanghai, China – 2018 - present
 - **Associate Dean of Arts and Sciences**, NYU Shanghai – 2022 - 2024
 - **Interim Dean of Arts and Sciences**, NYU Shanghai – 2021 - 2022
- **Associate Professor of Practice in Computer Science**, NYU Shanghai – 2015 - 2018
- **Postdoctoral Researcher**, Vrije Universiteit, Amsterdam – 2003 - 2004

Academic Leadership and Program Development

- Head of Computer Science, NYU Shanghai
- Interim Dean and Associate Dean, Arts and Sciences, NYU Shanghai
- Co-founder and Co-director of industry-oriented BSc program, Sorbonne Université
- Vice-President of the Faculty Recruitment Committee, Sorbonne Université

Funded Research and Industry-Oriented Collaborations

ANR PRC – FrugalDiNet (2024–2027)

Co-PI, collaboration with three French institutions. This project develops frugal distributed algorithms at the network layer using intelligent hardware such as programmable switches and Data Processing Units (DPUs). My contribution focuses on leveraging low-level telemetry data to design better datacenter services, enhancing resilience and scalability with minimal overhead.

NSFC – Scalable Collective AI (2025–2028)

Collaboration with Dr. Mathieu Lauriere, NYU Shanghai. This project studies coordination and learning in large populations of agents using mean-field models and reinforcement learning. I lead the distributed simulation and implementation, building scalable infrastructures to validate theoretical results in applied settings.

Selected former international collaborations

Inria/CONICYT Associate Team ARMADA (Chile), PI (2014–2017); *PHC MAIMONIDE* (France/Israel), PI (2014–2016); *Multiple doctoral grants* (CONICYT, Inria, French Ministry of Higher Ed.); *Eurocontrol FTATC* (Fault-Tolerant Air Traffic Management), Vice-Coordinator (2006–2007).

Graduate Supervision

12 MSc theses in distributed systems

3 PhD students defended:

Rudyar Cortès (2017): **Scalable location-temporal range query processing**

Maxime Véron (2015): **Scalable services for massively multiplayer online games**

Erika Rosas (2012): **Building trustworthy services in peer-to-peer networks**

Selected Publications *(Full publication list available upon request)*

1. P. Sens, L. Arantes, A. G. De Moraes Rossetto, O. Marin (2024) *Stab-FD: a Cooperative and Adaptive Failure Detector for Wide Area Networks*, **Journal of Parallel and Distributed Computing (JPDC)** 186.
2. Xiaonan Li, Olivier Marin (2022) *Towards Implementing ML-Based Failure Detectors* In: 18th **European Dependable Computing Conference (EDCC)**
3. Leyi Sun, Yifan Zhuo, Olivier Marin (2021) *Simple yet Efficient Deployment of Scientific Applications in the Cloud*, 27th **IEEE Int. Conference on Parallel and Distributed Systems (ICPADS)** Beijing, China.
4. X Bonnaire, R Cortes, F Kordon, O Marin (2017) *ASCENT: a Provably-Terminating Decentralized Logging Service*, **The Computer Journal** 60: 12. 1889–1911
5. Florent Coriat, Anne Fladenmuller, Luciana Arantes, Olivier Marin (2016) *Crowdsourcing-based architecture for post-disaster Geolocation: a comparative performance evaluation* In: 15th **IEEE Int. Symposium on Network Computing and Applications (NCA)**.
6. Luciana Arantes, Roy Friedman, Olivier Marin, Pierre Sens (2015) *Probabilistic Byzantine Tolerance for Cloud Computing* In: 34th **Int. Symposium on Reliable Distributed Systems (SRDS)**.
7. Samir Aknine, Olivier Marin (2005) *Role of Replication Planning for Fault Tolerant Multiagent Systems*, **Symposium on Adaptive Agents and Multi-Agent Systems (AAMAS)**.
8. Marin Bertier, Olivier Marin, Pierre Sens (2003) *Performance Analysis of a Hierarchical Failure Detector*, **International Conference on Dependable Systems & Networks (DSN)**.

Service & Recognition

- University awards: Excellence in Teaching (2010), Excellence in Research (2009, 2013)
- Over 60 Program Committee memberships since 2003 (ICDCS, ICPADS, NCA, etc.)
- Invited talks at Microsoft Research Asia, Tsinghua, Fudan, Yahoo Labs Chile, among others
- Proceedings Chair, Eurosys 2010; Tutorial Chair, SOSP 2017; General Chair, iThings 2026.
- Editorial Board, IEEE Distributed Systems Online (2003–2008)

Education

- **Doctor Europaeus PhD in Computer Science**, Université du Havre, France – 2003
- **MSc in Distributed Systems**, Université Paris 6 - Pierre & Marie Curie, France – 2000

Languages

English (fluent); **French** (native); **Chinese** (basic proficiency; working toward improvement)
